

Job Openings from DiDi Chuxing

DiDi Autonomous Driving:

Our goal for the team is to apply state-of-the-art AI algorithms on cars to make driving smarter and safer. Here you will be responsible to develop and implement one of the most cutting edge technologies onto multiple modules, and these algorithms will be applied on real vehicles to be deployed in DiDi's network.

Location: Beijing

- Software Engineer – Simulation
- Software Engineer – Infrastructure
- Software Engineer – Planning and Control
